and mesh bases

A well-rested world

is a more beautiful world

When well rested, you feel it: you are relaxed, energetic, alert, and friendly. You are awake.

We've been working on tomorrow's ultimate sleeping comfort for over 130 years. Every bed and mattress is made with care and attention to detail, the environment, and the future.

Auping Elysium

Designed with your body in mind

Every person is different, every body is different. For clothing, we find it very normal to choose our own personal size and fit, to make sure our pants or blazer feels comfortable. Why is this different for a mattress? How do you find a mattress that suits you best? Suits your body? Your preferences? You don't find that kind of mattress. You make it. Made-to-measure, of course.

At Auping, we offer different types of mattresses with different kinds of support. The right variant ensures that your spine is in a nice natural position, from your neck to your tailbone. This way your body recovers best during your sleep.

Personal support with Evolve, Elysium and Elite

Our ergonomic research shows that for optimal support, you need to apply different zones for the shoulders, waist, and hips. So that's what we've done.

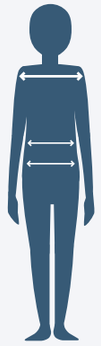

Our Evolve, Elsyium and Elite mattresses are available in 3 different types of zoning. The shape of your body determines the zoning that gives you the perfect support.

- Mattress with even zoning
- Mattress with extra shoulder zone
- Mattress with extra shoulder and hip zone

Once you have chosen the right zoning, you choose the hardness you need based on your height and weight. These mattresses are available in soft, medium and firm.

Your personal support has now been determined. All you have to do now is choose what you find most comfortable: Auping Evolve, Auping Elysium or Auping Elite.

Our Auping advisors in the store will be happy to help you find your perfect mattress.

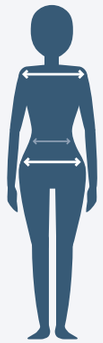

Mattress with even zoning

Are your hips, waist, and shoulders approximately the same width? Or are your shoulders slightly wider compared to your hips and waist? The mattress that suits you will have an even distribution of zones. This means that the hip, waist, and shoulder zones have roughly the same firmness, allowing your body to settle into a natural and comfortable resting position.

Mattress with extra shoulder zone

Are your shoulders wider compared to your waist and are your hips almost the same width as your waist? Then you'll sleep comfortably on this type of mattress, where the shoulder zone is slightly deeper in the mattress than your hips. This way, your shoulders can comfortably sink into the mattress, keeping your back in a natural position.

Mattress with extra shoulder and hip zones

Are your shoulders and hips wider than your waist? Then you need a mattress with extra support for your shoulders and hips. Both the shoulder and hip zones in this type of mattress are softer, allowing your shoulders and hips to sink comfortably into the mattress during the night. The waist zone, located between the hip and shoulder zones, is slightly firmer, providing good support for your midsection.

Auping Elite

Sleeping together on one bed

Do you and your partner need different levels of support but still want to sleep comfortably together on a double mattress? That's not a problem. All different zoning and firmness options can be combined in a double mattress.

Auping Evolve

Always well supported

Auping Evolve is the first fully circular mattress ever. A mattress made without foam or glue, of which the materials can be reused again and again to make new, fresh mattresses. This mattress is not only good for the environment, but also excellent for a good night's sleep.

Cool and flexible

If you tend to get too hot at night, Auping Evolve is the right choice for you. This mattress feels nice and cool. The use of polyester (instead of latex or foam) and the Vent-tex® comfort layer means that Evolve ventilates very well. And that's important for moisture regulation. Did you know that you lose about 350 ml of moisture every night? That's enough to fill about two long drink glasses.

Another advantage of Vent-tex® is that this material is highly flexible. This allows you to easily change positions at night without waking up. And did we mention that Auping Evolve is fire retardant and free of harmful substances?

For your body

Auping Evolve is available in 3 types of zoning and in 3 different firmness levels. This way, you can enjoy endless comfort on a mattress that perfectly suits you.

A delightfully fresh bed at all times

The topmost layer (ticking) of the Evolve mattress is easily removable using a zip and is machine washable at 60 °C – perfect for those allergic to dust mites.

Auping Elysium

Enriched comfort

Choose a mattress that is 20-30 cm longer than your own height. Do you and your bed partner differ in height? Then choose a mattress length that is 20-30 cm longer than the tallest of the two of you. Our mattresses are available in lengths of up to 220 cm.

Auping Elysium is a fully circular mattress made to sink into blissfully. That's because it has a Harmony-pocs® comfort layer, which we developed especially for this mattress. It is made up of many (over 800) mini springs that are individually packed in small textile bags. The springs distribute the pressure well and give you the feeling of being hugged, as if you were receiving a loving embrace. But it doesn't feel constricting because the mini springs have an open structure to ensure good airflow and moisture regulation.

Optimal ventilation

But this comfort layer is not the only factor that ensures good ventilation. This mattress does not contain foam or latex, materials that are often used in mattresses, but actually insulate a little too well. We deliberately chose polyester and a Vent-tex® comfort layer, not only because it is the most suitable material for making a circular mattress, but also because it doesn't absorb moisture, unlike cotton. It ensures that your mattress doesn't become stiflingly hot and that you don't get hot quickly at night either.

For your body

The Auping Elysium mattress is available in 3 types of zoning and in 3 different firmness levels. The right variant ensures that your spine is positioned in a natural alignment from your neck to your tailbone.

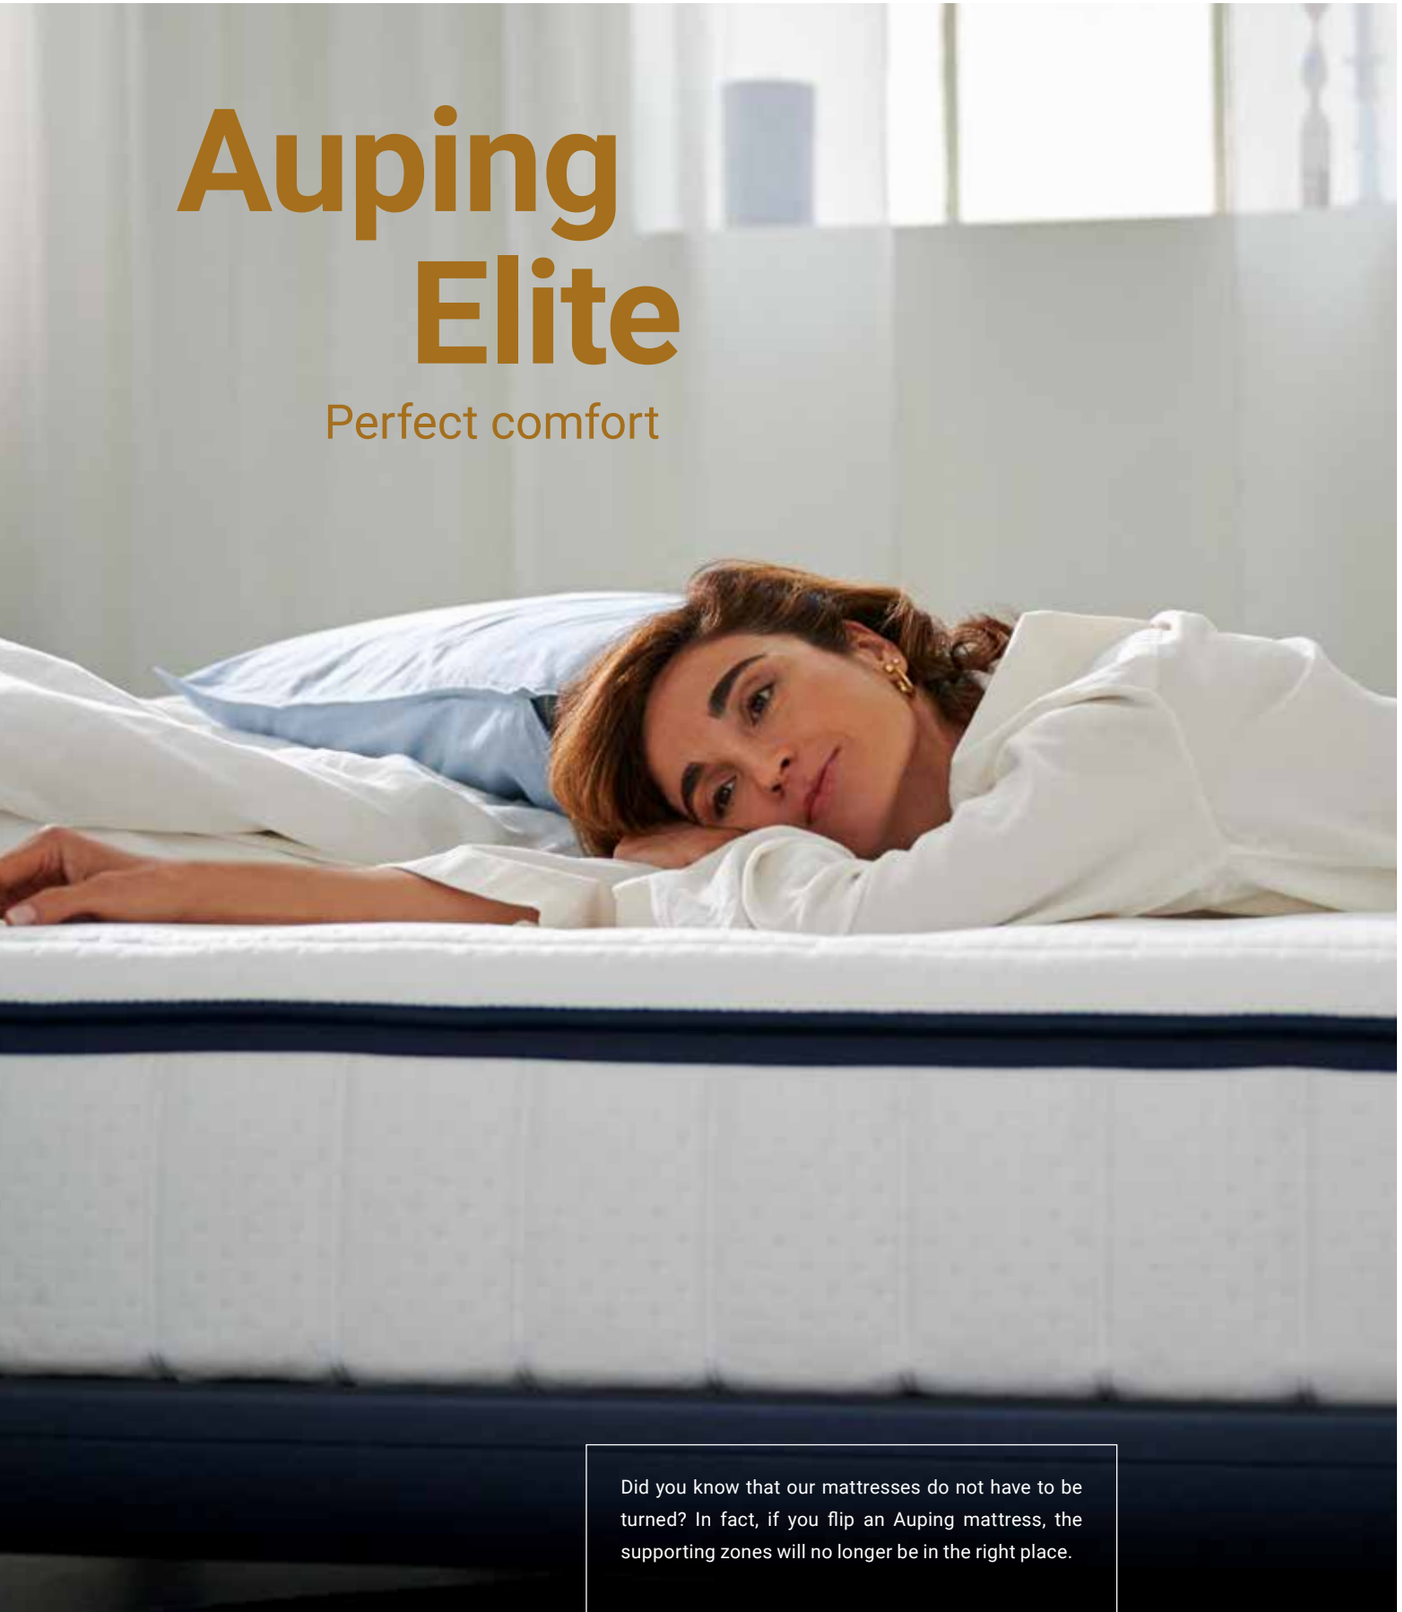

A delightfully fresh bed at all times

The topmost layer (ticking) of the Elysium mattress is easily removable using a zip and is machine washable at 60 °C – perfect for those allergic to dust mites.

Auping Elite

Perfect comfort

Did you know that our mattresses do not have to be turned? In fact, if you flip an Auping mattress, the supporting zones will no longer be in the right place.

In the more than 130 years of our existence, we have become very good at resting the world by making the best beds and mattresses. All that knowledge, skill and craftsmanship now come together in our new mattress: **Auping Elite**.

Wonderfully soft and cosy

Auping Elite is the most comfortable mattress you will ever lie on. Or should we say, that you will lie in? You just sink into it blissfully. It's as if your mattress is hugging you. This is mainly due to the Vita Talalay Origins® comfort layer. Vita Talalay is the most sustainable latex in existence and makes the Elite mattress resilient and wonderfully soft. To make the mattress even softer, we've added an extra layer. This layer is called Welcompadd® and consists of soft, diamond-shaped cushions close to your body.

Good ventilation

The mattress is primarily made of polyester. The airy structures of this material ensure that the mattress ventilates very well and moisture is removed. This is important because we lose about 350 ml of fluids every night.

Unmatched comfort

Auping Elite is available in 3 types of zoning and in 3 different firmness levels, so there is always an Elite mattress that fits your body perfectly.

A delightfully fresh bed at all times

The topmost layer (ticking) of the Elite mattress is removable by zip and machine washable at 60 °C – perfect for those allergic to dust mites.

Auping Revive

The Revive mattress offers good support for every sleeper. Guaranteed Auping quality with 3 comfort zones for support in the right places. Revive fits on any bed base and is available in a standard firmness.

Auping One

This new mattress is a sustainable choice for a deep sleep experience, helping you wake up feeling refreshed and energized. Available in two firmness levels.

Auping Two

This latest premium mattress offers a luxurious sleep experience with double-layer comfort, optimal ventilation, and vertically dynamic support that adapts to your movements. Available in two firmness levels.

Auping One

We take your old mattress with us

Each year, 35 million mattresses are discarded in Europe alone. Many mattresses are incinerated or end up as landfill – at a significant environmental cost.

At Auping, our vision is a world in which no mattress ends up in a landfill or incinerator. That is why we started the Auping Take Back System in 2011. When you buy a new mattress from Auping, we are happy to take your old mattress off your hands, even if it's not an Auping. We make sure these mattresses are reused where possible because, after all, we want to reduce material waste. And, of course, this saves you a trip to the landfill.

Circular mattresses

At Auping, we are constantly innovating. Not only in terms of design or ergonomics but also in terms of sustainability.

This also means we have adapted and updated our mattress range. The introduction of Auping Evolve, the first fully circular mattress in the world, was the first step in the right direction. We have now updated our mattress range with Auping One and Auping Two. A radical step, but one that we support 100%. We are aiming for a fully circular product range by 2030 at the latest.

Our mattresses come with a product passport

It is important to us that you know exactly what your mattress is made of. That's why our circular mattresses come with a Niaga® label. Products with this label are designed for reuse. By scanning the label, you can see which materials have been used to make your mattress and how it can be returned for recycling. This allows us to reuse the valuable materials again and again so together we can help eliminate waste.

Auping Elysium

B Corp

We earned the title of certified B Corporation in March 2020. B Corps are companies that aim to make a difference in society and want the world to remain a liveable, healthy, and safe place for future generations. Organisations with the B Corp certificate voluntarily pursue the highest standards in terms of social and environmental performance, social responsibility and transparency.

Since our foundation in 1888, we have continued to develop ground-breaking, handmade products that have changed the world of sleep and rest. The B Corp status is more than a certification to us. Achieving and maintaining this status inspires and challenges us. This is how we make sure every morning is better than the one before.

The Auping

mesh base

In 1888, Johannes Albertus Auping was a hard-working blacksmith from Deventer who did not shy away from a challenge. When the director of a hospital asked him for a bed that provided ventilation, Auping made a braided mesh mattress. He did this by attaching iron threads to the cutting plate of a string bean grinder and then turning it around an axle. This created a beautiful braid. To this day, the ventilating mesh base is still the basis of all our beds and box springs.

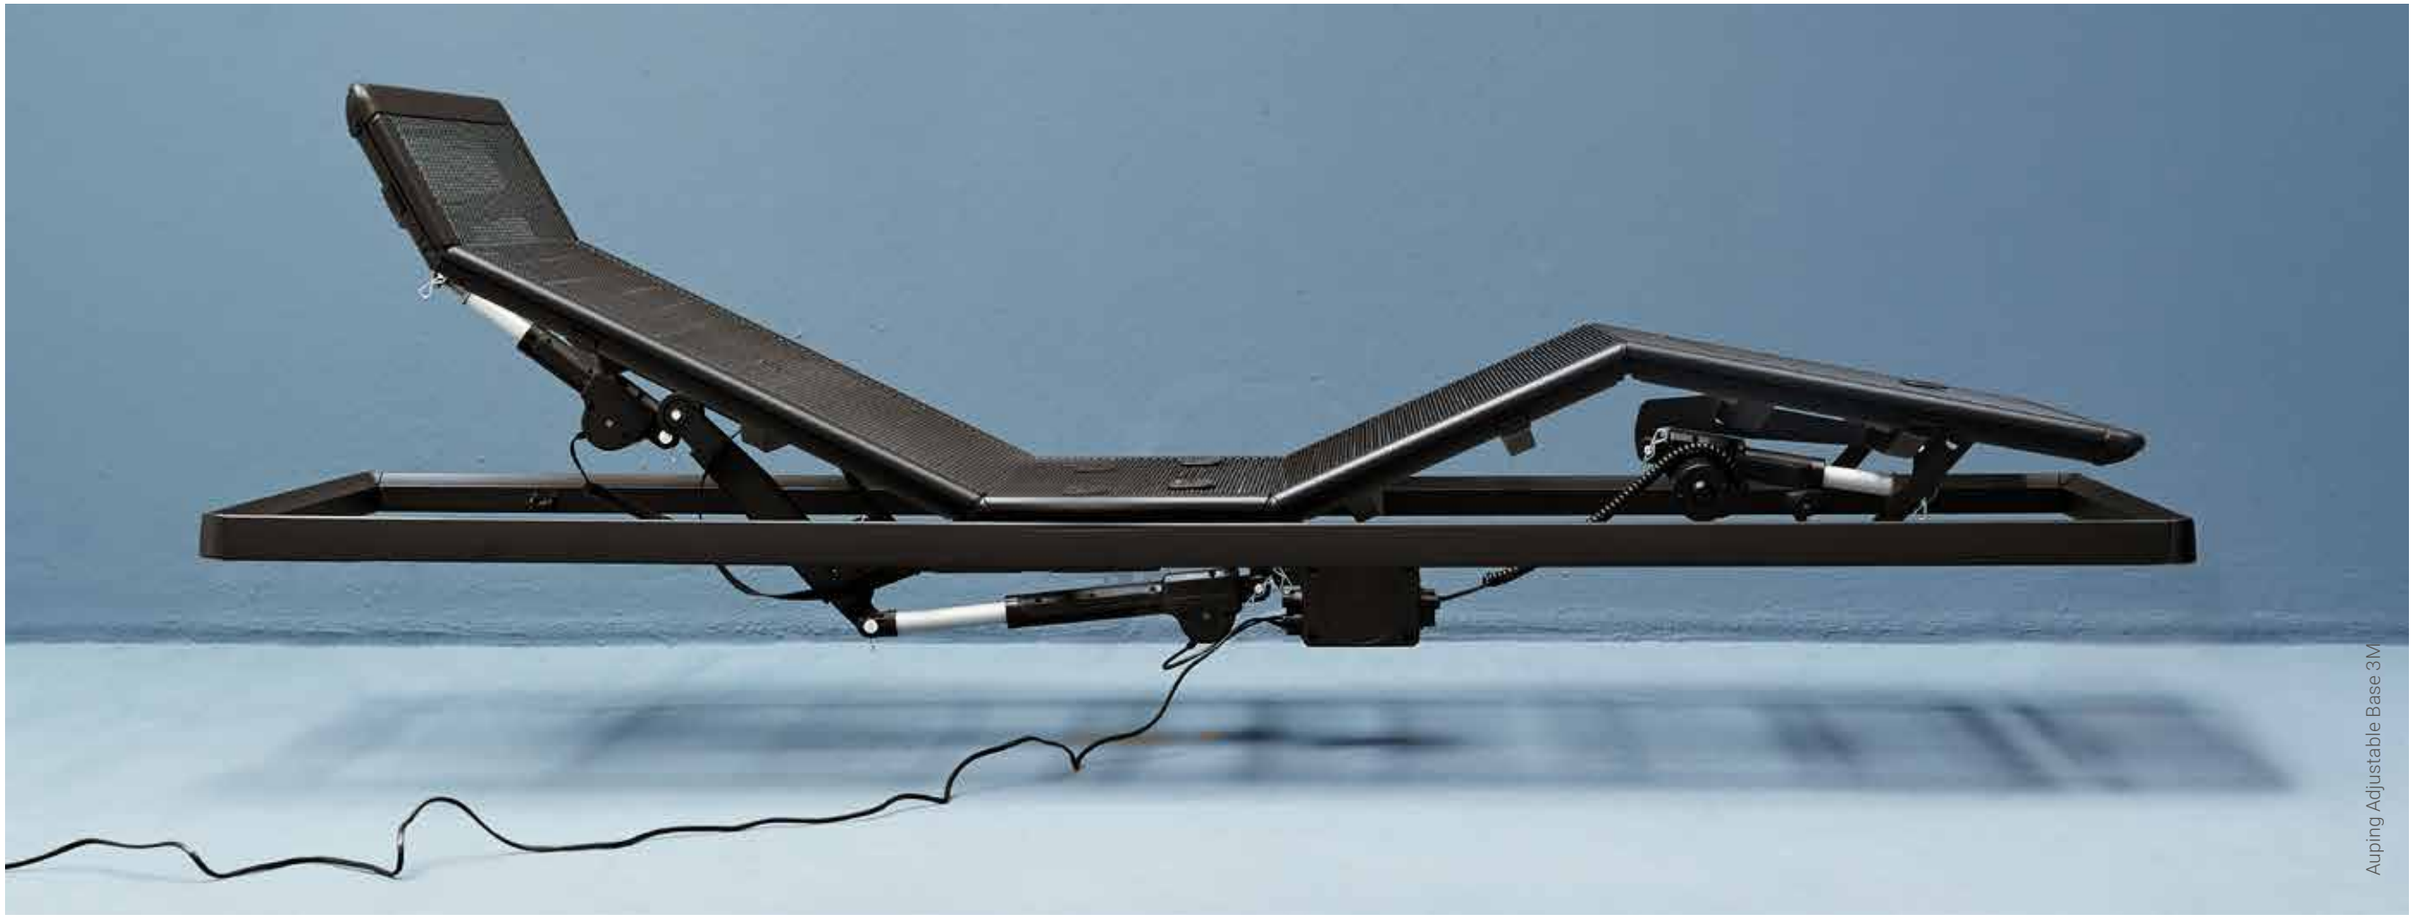

A good bed base is very important while sleeping. If you and your mattress get the best support, you can have wonderful dreams every night. And with the right bed base, your mattress can also breathe better and last longer.

Three benefits of an Auping mesh base:

- Because the mesh base has 80% open space for air, it ventilates better than every other bed base.
- The transversely stretched mesh, with its 10,000 support points, provides excellent support.
- The mesh base is made of hard-wearing steel so you can dream away on it for a lifetime.

Support for you back

Our mesh bases also come adjustable. This is perfect for when you are suffering from back pain or a persistent cough. Or if you like to read or watch Netflix in bed. You can choose exactly what you want to adjust: the back, the legs, or the head. You can even adjust all three if you want.

Smart Base

All our electrical adjustable mesh bases are “Smart.” They do much more than just providing good ventilation and support. For example, you’ll never have to lie awake again due to your snoring partner, thanks to the anti-snore function. There’s also a smart alarm that gently wakes you up when you’re in your lightest sleep phase, and it’s equipped with voice control. This way, you can activate your favorite positions just by asking nicely.

Wake Up without an alarm
Instead of that annoying alarm sound, your bed’s headrest gently lifts when you’re in your lightest sleep phase. A gentle and nice way to wake up.

No more lying awake from a snoring partner
As soon as the accompanying app detects snoring, the mesh base moves slightly, or the head of the bed rises a bit. This helps you breathe freely again. Now it is all quiet again in the bedroom.

A bed that listens to you
The Smart Base is also equipped with voice control. This allows you to activate your favorite positions just by asking nicely. Besides snoring, your bed also knows how long you’ve slept and when you’re in your lightest sleep phase. With all these insights, you can make the most out of your night.

Connect with all your favorite devices at home
Good sleep naturally starts with a comfortable bed and mattress, but there’s more to it. The right sleep temperature and lighting in your bedroom are also crucial for a good night’s rest. So, connect your bed to your Sonos speaker, Philips Hue lamp, or other smart devices in your room.

Convenience: easy Control
You can easily control the Auping Smart Base with your smartphone or tablet. You can control two mesh bases with the corresponding Auping Connect app, and you no longer need separate remote controls for different devices. The memory function remembers your favorite settings, so you only need to set your bed once.

Your bed, your pillow, your duvet

For a good night’s sleep, naturally you need a comfortable bed and a mattress that meets your needs. But a pillow that offers the right support, is also essential for a good sleeping position. And nothing feels better than crawling under a delightfully soft duvet at the end of a long day? Because everyone is unique, we offer a range of options when it comes to our pillows and duvets. All of our products are made from natural and sustainable materials. All down products in the Auping range are certified according to the Responsible Down Standard or the Global Recycling Standard. **auping.com/rds**

Auping Dew 4 seasons

Auping duvets
Like to wrap yourself up like a cocoon or prefer a lightweight duvet that doesn’t weigh you down? Anything goes, but a duvet with the right temperature and ventilation will help you sleep even better. Auping has three different types of high-quality duvets, from down to hypoallergenic. All Auping duvets are available in a 4 seasons, spring/fall and summer version.

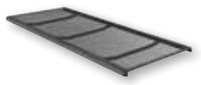

Auping pillows
There are few moments as gratifying as when you finally lay your head down on your pillow at the end of a long day – that is, if you have the right pillow for your sleep style. After all, the restorative power of a pillow is often underestimated. Auping pillows align perfectly with our mattresses, as well as different sleeping positions. A good pillow – not too soft and not too hard – perfectly supports your head, neck and shoulders. This lets your entire body relax fully in a comfortable, natural position.

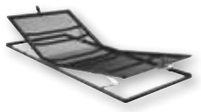

Our range

Electrically adjustable

Choose your **mesh base**

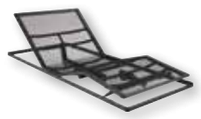

Flat
Without adjustment options.
